HORECA

CATALOGUE

**HOSPITALITY, RESTAURANTS AND
CATERING**

OFFERING THE BEST
GLOBAL HYGIENE
SOLUTIONS TO OUR
CUSTOMERS
SINCE 1985

CONTENTS

- Kitchens** **01**
- Whatever your activity (bar, restaurant, hotel, group, take away and/or services for travellers), our sales and R&D+i departments will find the best solution to minimise your costs and maximise the results.
- Dining room** **02**
- Specific products and solutions for each of the segments of the dining room
At DISARP we analyse your business to achieve the best formula in cleanliness and hygiene, optimising the resources available to the maximum.
- Bedrooms, toilets and bathrooms** **03**
- Each part of the hotel needs its cleaning products and protocols.
At DISARP we offer the necessary solution for the cleaning and hygiene of bedrooms, and for disinfection in toilets and bathrooms.
- Laundry** **04**
- Our R&D+i and Systems department, with the help of the Technical Support Service, creates the products and systems to meet your needs.
- Gym** **05**
- Gyms are spaces where there is a large number of people doing physical exercise every day. The cleaning of gyms should be thorough. This process is fundamental for users' hygiene and health.
- Swimming pool and spa** **06**
- We provide everything necessary to obtain the best water quality for its use, free from health dangers for the users
- Car park and maintenance** **08**
- This is a very sensitive point that requires the appropriate products and systems that enable this daily and latent need to be covered.
- Eco z** **09**
- The Eco z solution from DISARP is the most environmentally friendly. It reuses the diffuser packaging, using refills and thus reducing the environmental impact. The packaging is biodegradable, minimising waste to zero. In addition to all of this, the size of the packaging makes transport cheaper and thus reduces CO2 emissions.
